Turn to the Original Hot Hand[®] Protector

Channel your inner artist and create lab assistants quickly and easily with your Hot Hand[®] Protector and a permanent marker.

Use the patterns provided on the following pages, designed by national craft designer Linda Valentino, or create your own cast of characters!

Tips for Success

- Use a soft pencil to draw guidelines before using marker
- Use permanent marker (Design may still fade or come off with different uses)
- Marker lines may take a little longer to dry on Hot Hand[®] Protector's silicone rubber surfaces. Wait a few minutes as you work on each section to prevent smeared lines.
- Draw with Confidence! Try not to look directly at the marker but about an inch ahead to where the marker is headed. Lines drawn with deliberate strokes even if they are not exactly correct will look much better than lines drawn with a slow shaky hand. Go for it!

661 Route 23 South, Wayne, NJ 07470

Hot Hand® Mitts provide superior protection when handling hot or cold objects, including dry ice. Made of strong silicone rubber which resists tearing, it withstands temperatures as high as 260°C (500°F) and remains flexible at temperatures as low as -57°C (-70°F). Thumb and fingers fit into each pocket. The gripping surfaces have concave tipped studs for a non-slip grip.

Feature Your Characters on belart.com!

Like what you've done? Send us a photo of your Hot Hand® Protector at info@belart.com and we'll put them in our on-line gallery!*
