

Cleanware™ Microscope Optics Cleaning Kit Catalog No. F17072-0000

This kit makes it easy to keep optics clear and all microscope parts clean. The kit contains 10 pre-saturated optic and lens cleaning pads, 2 individually wrapped packs of anti-static plastic surface wipes, 2 pre-moistened germicide swabs 6" (152mm) long and complete instructions.

The Value of Regular Maintenance:

Your microscope can give you years of hassle-free use with just a little time spent regularly on cleaning and maintenance. By removing stains from the body and regularly cleaning the optics, you will prevent residue build-up, which causes poor visuals and machine down time.

Cleaning Instructions:

1. Open one lens-cleaning pad and wipe off all optics. No drying necessary.
2. Open resealable pouch and use wiper to clean off entire microscope body.
3. Open one Pre-moistened Swab and clean out all crevices around base, stage and light source.
